Secure | Fast | Diverse | Open

## EXPRESS OPTICAL PLATFORM BETWEEN EUROPE & LATIN AMERICA

EllaLink is a state-of-the-art optical platform offering secure **high capacity connectivity on a unique low latency transatlantic route**, linking the major terrestrial and subsea hubs in Europe and Latin America.

### SECURE

Direct access between Europe and Latin America, guaranteeing data privacy

### FAST

Up to 50% latency reduction on direct City to City connections between Latin America and Europe

### DIVERSE

A unique route offering geographic diversity from existing transatlantic systems and providing an alternative path between the two continents, both on land and at sea

### OPEN

EllaLink is a privately funded and independent company committed to providing services on a Carrier Neutral, Open Access basis

## CONNECTIVITY

EllaLink offers a variety of **low latency PoP to PoP** capacity services from 10G to 100G wavelengths with additional onward connectivity extensions in conjunction with EllaLink's partner networks in Europe, Latin America, Asia and Africa.

## SPECTRUM

The EllaLink platform integrates amplified subsea & diverse terrestrial segments into a unique optical design. A block of frequencies can be allocated on demand and will continue to be monitored by EllaLink. Our spectrum and managed spectrum services **optimize the total cost of ownership thanks to a seamless optical platform connecting Europe to Latin America end to end** without intermediate networks.

## COLOCATION

EllaLink offers packaged **space & power facilities** in a completely open and neutral environment. These services are available at the edge of the wet plant or at core city PoP locations.
